Fashion Brand Turnaround Pack

A deliberate 90-day commercial reset to convert visibility into orders, deposits, repeat clients, and premium brand momentum.

90-DAY TURNAROUND

SALES SYSTEM

BRANDED EXECUTION

Executive summary

The issue is not creativity. The issue is that the brand has not yet been converted into a repeatable sales machine.

Current gap

Followers and content exist, but buying path, packages, prices, proof and urgency are not commercialised.

Commercial focus

Graduate looks, wedding guests, church elegance, corporate capsule and bridal/group packages.

Turnaround move

Productise custom fashion into signature offers with visible prices and a WhatsApp sales office.

90-day outcome

Consistent inquiry flow, deposit conversion, client proof, referrals and campaign rhythm.

Diagnosis: where demand is leaking

Unclear offer

Customers see talent but may not know what to buy first.

Hidden price anxiety

No price ladder creates friction and weak lead qualification.

Weak buying path

Every platform must drive to WhatsApp with order steps.

Low trust proof

Fashion buyers need client photos, timeline, receipt and fitting process.

Random content

A campaign calendar is needed: graduation, wedding, church, workwear.

POSITIONING

Become the go-to designer for elegant, feminine, made-to-measure outfits for Basotho women who want to look special without looking ordinary.

Brand lane: elegant, feminine, event-ready, custom but accessible. Not “anything custom”, but a signature fashion house with clear collections.

Target market strategy

Graduates

Emotional, date-driven, family-funded.

Wedding guests

High urgency and repeat seasonal demand.

Bridesmaids

Group packages with higher order value.

Church women

Monthly occasion cycle and modest elegance.

Professional women

Higher purchasing power and repeat wardrobes.

Diaspora Basotho

Cultural-modern pieces shipped or collected.

Priority for first 90 days: graduates + wedding guests + church/event women, because they have visible occasions and urgent buying triggers.

WhatsApp Business setup must include: catalogue, quick replies, labels, auto greeting, price guide, order form and deposit receipt.

Content engine: stop posting randomly

- Mon** Outfit of the week
- Tue** Behind the seams
- Wed** Client transformation
- Thu** Price/package post
- Fri** Event-ready reel
- Sat** Pickup/testimonial
- Sun** Church elegance

Every post needs one of four jobs: prove quality, educate the buyer, show the process, or ask for the order.

Campaigns that create buying urgency

Graduated Designer, Dressing Graduates

Turn her graduation into a commercial story. Packages from M650, friend-group discounts, photographer partnerships.

Never Basic at a Wedding

Wedding guest dresses, mother-daughter sets and bridesmaid packages. Use real clients and countdowns.

Sunday Best Elegance

Modest, feminine church and event outfits. Launch before salary weekends.

Corporate Woman Capsule

3-piece workwear sets for banks, telecoms, NGOs, government and universities.

Campaign rule: theme + product + price-from + deadline + WhatsApp CTA + proof.
